AMERIMOLD 2019 TOTAL REGISTRANTS: **2,545** LOCATED IN ROSEMONT, IL

After a year of unpredictable hurdles surrounding the COVID-19 pandemic, Amerimold 2021 is poised to welcome the moldmaking and molding community back home. Amerimold will continue to focus on providing exhibitors and attendees the unique opportunity to connect with each other at every point of the mold lifecycle—from design to first shot.

What you can expect at Amerimold 2021:

- Co-locations with the Molding Conference and Extrusion Conference
- The return of the Amerimold Sourcing Fair, giving exhibitors the chance to connect with major tier suppliers
- A robust and free education program featuring the brightest minds from the moldmaking and molding industry
- Networking opportunities unlike anything Amerimold has ever offered before

³ Total Injection Molding includes OEMs with in-house injection molding

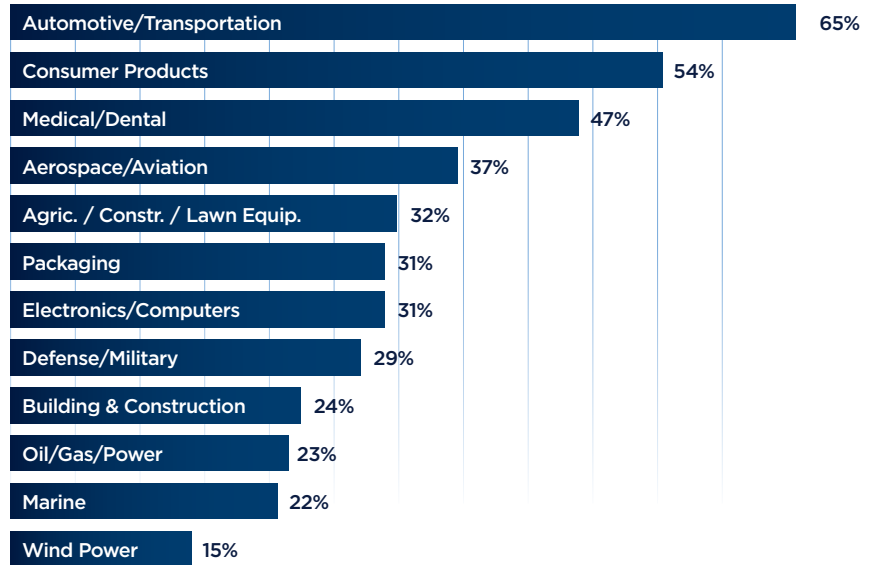

PRODUCTS EVALUATED:^{1*}

“The benefits of exhibiting at Amerimold far outweigh just the potential business connections and opportunities that are uncovered—which are substantial. Amerimold is really a State of the Union type of event for our industry. All the players are gathered in one location and everyone’s willingness to share and collaborate is phenomenal.”

– Tom Houle, Director, LUMEX Matsuura

AMERIMOLD CO-LOCATIONS

For the first time ever, Amerimold will be co-located with two distinct events: the Molding Conference and the Extrusion Conference. All attendees of these events will have free access to the Amerimold show floor, giving Amerimold exhibitors access to a diverse, focused audience the likes of which Amerimold has never seen before.

Molding 2021

Molding 2021 is an educational conference where industry leaders discuss the latest developments in various molding processes, equipment, materials and management techniques, with special emphasis on adding value to your business. This conference is widely recognized as the most important forum for technical information and business conditions in injection molding.

MOLDINGCONFERENCE.COM

Extrusion 2021

Extrusion 2021 is a two-and-a-half day conference consisting of sessions devoted to technical and business issues common to all types of extrusion, followed by breakout sessions devoted to specific types of extrusion. These presentations, together with the exhibits area at Extrusion 2021, give attendees unprecedented access to new technology, tips and techniques, and best practices aimed at helping attendees boost efficiencies at their operations.
